

AYUSH BABU

Software Engineer · AI Automation · Data Science · SaaS & Cloud

Kanpur, India (open to relocate) | ayushbabu121004@gmail.com | linkedin.com/in/ayushjaiswal2310
github.com/Ayush231002 | Portfolio: ayush231002.github.io/ayush-portfolio | Live product: billing.elvoraglobal.in

PROFESSIONAL SUMMARY

Software engineer who designs, builds and operates production systems end-to-end. Shipped a **live multi-tenant GST billing SaaS** solo — REST API, three-path authentication, payment subscriptions, cloud deployment with TLS and monitoring — now serving real businesses. Equally strong on the data side: ML pipelines, automated AWS infrastructure and executive Power BI dashboards, plus hands-on experience **training students in analytics**. Currently pursuing an MSc in Data Science alongside full-time building.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL

Backend & APIs: Node.js, Express.js, REST APIs, JWT, OAuth 2.0, PostgreSQL, MongoDB, Razorpay

Cloud & DevOps: AWS EC2, CloudWatch, NGINX, PM2, Linux, Render, Firebase, TLS/SSL, Git/GitHub

Data & BI: Power BI, DAX, Power Query, Advanced Excel, Pandas, NumPy, Scikit-learn

AI & Automation: Claude AI, OpenAI APIs, AI agents, prompt engineering, workflow automation

Frontend & Tools: React, Tailwind CSS, HTML5/CSS3, Postman, VS Code

EXPERIENCE

SaaS Developer (Solo Builder) — ELVORA Billing Suite

2025 – Present

Independent product · Live at billing.elvoraglobal.in

- Architected and shipped a **multi-tenant GST billing platform** end-to-end: Node.js / Express 5 REST API, PostgreSQL (25+ tables) with idempotent versioned migrations, deployed to the cloud on a custom domain with TLS.
- Built **three-path authentication** (password, email OTP, Google OAuth) on JWT access tokens + HttpOnly refresh cookies, with rate limiting, hardened security headers and server-side session tracking.
- Integrated **GST identity verification** through a multi-provider fallback chain with full checksum validation and response caching; auto-fills verified company profiles at signup.
- Cut signup round-trip from **40+ seconds to ~3 seconds** by making OTP email dispatch non-blocking with background retry; built atomic signup rollback that eliminated orphaned tenant data in production.
- Implemented **Razorpay subscription billing** with a 14-day trial engine and self-seeding plan catalog; debugged a Google sign-in popup deadlock to a single Cross-Origin-Opener-Policy header.

Power BI Trainer & Mentor

2024 – Present

Analytics mentorship program

- Designed and deliver a **6-module beginner-to-advanced curriculum** (Excel foundations, Power Query, data modeling, DAX, visual storytelling, capstone); fully project-based on real messy datasets.
- Students have shipped **15+ published dashboards** across sales, finance, HR and inventory domains.

Power BI Developer (Freelance)

2024 – Present

Project-based engagements

- Built financial and sales dashboards on governed SQL models with centralized DAX measure libraries and row-level security; cut manual reporting effort by **~60%** and a month-end cycle from **3 days to 2 hours**.

Cloud Data Engineer (Self-Directed)

2024

AWS infrastructure projects

- Migrated fragile local ETL to **AWS EC2** with cron scheduling, lock-file overlap protection and CloudWatch alarms — **99% pipeline uptime** with zero manual runs.

Data Analyst Intern

2023 – 2024

DUCAT Foundation

- Delivered end-to-end analytics and ML models across classification and regression tasks using Python and Pandas.

SELECTED PROJECTS

SENTINEL — Device Intelligence & Session Security

Security tooling

- Defensive monitoring dashboard: **device fingerprinting** (12+ browser/hardware signals), IP and geolocation enrichment, session registry with admin revocation, and deterministic new-device / new-location login alerts.

Customer Churn Prediction

Machine learning

- Random Forest with SMOTE on **10K+ customer records**; **87% accuracy** tuned for recall via precision-recall curves; distilled 5 plain-language churn drivers for leadership action.

Financial Performance Analytics

Business intelligence

- Replaced a 3-day manual month-end Excel process with a governed Power BI model — **automated refresh**, row-level security and 3-level drill-through from executive summary to transaction detail.

EDUCATION

MSc, Data Science (Online Mode)

2024 – 2026 (pursuing)

Chandigarh University

- Specialization in applied machine learning, statistical modeling and big-data analytics.

BCA, Computer Applications

2020 – 2023

CSJM University, Kanpur

- Data structures, databases, algorithms and software engineering with applied data-science modules.

CERTIFICATIONS

- **AWS Cloud Practitioner** — Amazon Web Services, 2024
- **Power BI Data Analyst** — Microsoft, 2023
- **Data Science with Python** — YBI Foundation, 2023
- **Python for Data Analysis** — Coursera, 2023
